SUMMARY

Software Engineer with experience in developing SaaS applications and infrastructures for both cloud and on-premise ecosystems, using monolith and microservice architectures. Committed to leveraging software development and infrastructure expertise to drive innovation and support strategic objectives.

TECHNICAL SKILLS

Languages: C#, TypeScript, Python, Erlang, C, C++, PowerShell, SQL, Bash, Tailwind CSS, Java, Go, Groovy, PowerFx

Frameworks and Tools: Microservices, Angular, NgRx, .NET Core, Node.js, Express.js, Elasticsearch, Kibana, Kafka, RabbitMQ, Redis, Docker, Kubernetes, OpenAPI, Azure, AWS, React, jQuery, Flask, PyTorch, SharePoint

Databases: SQL Server, PostgreSQL, Cassandra, MongoDB, Dataverse, Microsoft Excel

APIs and Protocols: REST, SOAP, WebSocket, GraphQL

Platforms: Unix, Git, SVN, Jira, Azure DevOps, Render, Microsoft 365, Power Platform, Copilot Studio, Figma

WORK EXPERIENCE

Software Development Engineer Intern

May 2025 – August 2025

Motorola Solutions

Remote, New Jersey, United States

- Improved communication loop closure time in the public safety domain by an estimated 25% by implementing a read-receipts feature into a websocket and microservice-based messaging application using Angular for the frontend, TypeScript for the API Layer, C# for event processing, PostgreSQL and Elasticsearch for data persistence, Redis for caching, and GitHub Actions, Docker, and Kubernetes for the deployment pipeline.

Senior Principal Infrastructure Engineer

November 2022 – August 2024

Mphasis

Bengaluru, Karnataka, India

- Reduced manual ticket handling for medical support device catalog by an estimated 20% and decreased average initial response time by 60% by developing and deploying an automated bot for Microsoft Teams, written in C#.
- Accelerated development cycles for new apps to process sensitive medical research data by 25% by building a library of reusable TypeScript UI components to be used in PowerApps, which was adopted as the standard for a team of 15+ developers.
- Enabled secure, automated Power BI reporting for 10+ bio-medical business-related dashboards by architecting a Web API connection via Azure AD through a Power Query, serving 50+ stakeholders while eliminating previous security risks associated with user account-based access.
- Drove a 15% improvement in HoloLens device compliance across surgical centers by creating Power BI reports that provided actionable insights into key metrics, leading to more efficient device management and retrieval.
- Achieved annual cost savings of over \$50,000 by replacing two 3rd party medical helpline applications with custom in-house solutions by leveraging Power Platform and C#, improving process efficiency by 30%.

Associate - Projects

October 2021 – October 2022

Cognizant

Bengaluru, Karnataka, India

- Saved on-field agricultural experts an average of 5-10 minutes per data entry task by developing a C# API that automated the extraction of image location coordinates, reducing manual input errors by nearly 100%
- Enhanced accuracy of survey data for agricultural crop control by 35% by creating complex, logic-driven questionnaires using Power Apps, Power Automate, and C#, thus reducing the time needed for data collection and cleaning.
- Managed ETL pipelines in Dataverse that were responsible for the daily transfer of 5 GB of critical regulatory science business data between environments with a 99.9% success rate, ensuring data integrity.

Information Technology Analyst

August 2018 – September 2021

NTT Data

Bengaluru, Karnataka, India

- Streamlined training record management for 500+ employees in an insurance firm by developing a centralized SharePoint application using JavaScript and React, reducing manual reporting time for managers by an estimated 5 hours per month.

- Reduced data processing latency for marine insurance systems by 30% and ensured real-time data consistency by integrating 4 disparate enterprise systems using MuleSoft REST APIs, into an existing ASP.Net application using C#.
- Reduced manual deployment time of claims-handling applications from 2 hours to 15 minutes and cut deployment-related errors by 90% by architecting and implementing a PowerShell automation framework.
- Improved average application response time by 20% and reduced the user-reported bug backlog by 40% by implementing key features and performance enhancements in ASP.NET applications for IT support using C#.

EDUCATION

Stevens Institute of Technology

Hoboken, New Jersey, United States

Masters in Computer Science (GPA: 3.9)

August 2024 – December 2025

- **Focus Areas:** Distributed Computing, Concurrency Control, Database Management, Unix Programming, Data Structures, Algorithms.

KSSEM (affiliated to Visvesvaraya Technological University)

Bengaluru, Karnataka, India

Bachelor of Engineering in Electronics and Communication (GPA: 3.5)

August 2014 – June 2018

- **Focus Areas:** Micro processors and controllers, Operating Systems, Information Theory, C Programming, Logic Gates, VLSI, Field Theory, Satellite Communications.

CERTIFICATIONS

- Microsoft Certified: Software Development Fundamentals (MTA 98-361)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Certified: Azure Data Fundamentals (DP-900)
- Microsoft Certified: Azure AI Fundamentals (AI-900)

PERSONAL PROJECTS

Chess.com AI Assistant | .Net Core, TypeScript, PostgreSQL, Angular, LLM

- An AI-based app that provides suggestions to improve an individual's performance in games on Chess.com, based on their monthly archives.

Course Tracker | React.JS, Express.JS, Node.JS, MongoDB, Render

- Full Stack Web application to search and manage the catalog of courses, built on REST API.
